

WHAT WE DO...

"We supply components that make it easy for engineers and tradesmen to create and maintain the veins and organs of piped services systems."

Providing innovative products and turn-key solutions that are otherwise hard to find
Testing everything we sell to ensure it will work reliably for you
If you can't find something, ask us; we can help
We don't hide stuff; we provide all the needed information online at your fingertips
Continually improve our processes to make your ordering experience "easy as"
Fast dispatch and communication all the way about when your orders will arrive
If we ever mess up, we'll fix it right away
Asking you how we can improve or help make your job easier
Listening to you if we're not making it easier

PCRK-FS Replacement Cutting Wheel
for Steel & Stainless Tube

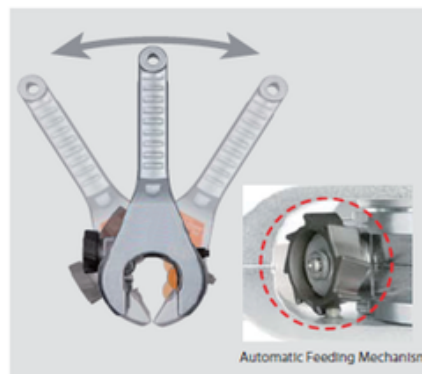

PCRK-S Replacement Cutting Wheel
for Stainless Pipe

Blade designed to not spark, chip or burr pipe.

With a ratchet mechanism and rotary head you can cut pipe even in the tightest of spaces.

The cutters automatic feeding mechanism allows for quick cutting without tightening the knob more than once
