

MAKO Digital Backflow Test Kit

SPEC SHEET

PRODUCT CODE: MAKOMK5TK

OVERVIEW

The Flowquip MAKO Digital Backflow Test Kit is a fast, accurate electronic gauge designed for testing backflow preventers. The digital display makes readings easy to see in vaults and tight spaces, while the capture function lets you store readings during testing so you don't lose your place.

Built for daily field use, the MAKO features a rugged housing, stainless sensor components, flexible test hoses, and long battery life. Bluetooth capability also allows digital reporting through compatible testing apps.

KIT FEATURES

- High accuracy digital gauge – ± 0.7 kPa accuracy (0–100 kPa range)
- Capture button – stores readings during testing
- Large backlit display – easy to read in dark pits and plant rooms
- Bluetooth connectivity – supports digital test reports via smartphone apps
- Rate-of-change indicator – shows how quickly pressure readings change
- Swivel hook – hang the gauge on pipework or ladders while testing
- Flexible backflow test hoses – designed for tight access installations
- Rugged construction – impact resistant nylon housing with brass internals
- Stainless steel sensor – reliable performance and long service life
- Food-safe wetted components – suitable for potable water systems
- Long battery life – approx. 4 months with daily use
- 5 year warranty

KIT INCLUDES

- MAKO Digital Test Gauge – MK5 5 Valve Model
- Soft padded carry case
- 3 × Test hoses
- 2 × Bleed hoses
- 4 × AA batteries
- Calibration certificate

TECHNICAL SPECIFICATIONS

Measurement Range: 0 – 100 kPa

Accuracy: ± 0.7 kPa

Display: Backlit digital LCD

Power: 4 × AA batteries

Battery Life: Approx. 4 months (daily use)

Housing: Impact resistant nylon

Sensor: Stainless steel

Wetted Materials: Potable water safe
